WARNING :	MAY CAUSE EYE AND RES	SPIRATORY IRRITATION.	
	BONDS SKIN IN SECONDS	S •	

#### Relevant routes of exposure : Skin, Inhalation, Eyes

SKIII, IIIIAIACIOII, EYES
Exposure to vapors above the established exposure limit results in
respiratory irritation which may lead to difficulty in breathing
and tightness in the chest.
Bonds skin in seconds. May cause skin irritation. Cyanoacrylates
have been reported to cause allergic reaction but due to rapid
polymerization at the skin surface, an allergic response is rare.
Cyanoacrylates generate heat on solidification. In rare
circumstances a large drop will burn the skin. Cured adhesive does
not present a health hazard even if bonded to the skin.
Irritating to eyes. Causes excessive tearing. Eyelids may bond.
Not expected to be harmful by ingestion. Rapidly polymerizes
(solidifies) and bonds in mouth. It is almost impossible to swallow.
Skin, eye, and respiratory disorders.
Skill, eye, and respiratory disorders.
Remove to open space with fresh air. Seek medical attention to treat
symptomatically if discomfort persists.
Do not pull bonded skin apart. Soak in warm soapy water. Gently peel
apart using a dull instrument. If skin is burned due to the rapid

generation of heat by a large drop, seek medical attention. If lips are bonded, apply warm water to the lips and encourage wetting and pressure from saliva in mouth. Peel or roll lips apart. Do not pull

	lips apart with direct opposing force.
Eye Contact :	Immediately flush with plenty of water for at least 15 minutes. Get
	medical attention. If eyelids are bonded closed, release eyelashes
	with warm water by covering with a wet pad. Do not force eye open.
	Cyanoacrylate will bond to eye protein and will cause a lachrymatory
	effect which will help to debond the adhesive. Keep eye covered until
	debonding is complete, usually within 1 - 3 days. Medical attention
	should be sought in case solid particles of polymerized Cyanoacrylate
	trapped behind the eyelid caused abrasive damage.
Ingestion :	Ensure breathing passages are not obstructed. The product will
	polymerize rapidly and bond to the mouth making it almost impossible
	to swallow. Saliva will separate any solidified product in several
	hours. Prevent the patient from swallowing any separted mass.
Notes to physician :	Surgery is not necessary to separate accidentally bonded tissues.
	Experience has shown that bonded tissues are best treated by passive,
	non - surgical first aid. If rapid curing has caused thermal burns
	they should be treated symptomatically after adhesive is removed.

## 5. FIRE - FIGHTING MEASURES

Flash point :	80°C (176°F) to 93.4°C (200°F) Tagliabue closed cup
Autoignition temperature :	485°C (905°F)
Flammable / Explosive limits - lower % :	Not determined
Flammable / Explosive limits - upper % :	Not determined
Extinguishing media :	Dry powder. Foam. Water spray. Carbon dioxide.
Special fire fighting procedures :	Fire fighters should wear positive pressure self - contained
	breathing apparatus (SCBA).
Unusual fire or explosion hazards :	None
Hazardous combustion products :	Trace amounts of toxic and $/$ or irritating fumes may be
	released and the use of breathing apparatus is recommended.

6. ACCIDENTAL RELEASE MEASU	
Environmental precautions :	Ventilate area.
Clean - up methods :	Do not use cloths for mopping up. Flood with water to complete
	polymerization and scrape off the floor. Cured material can
	be disposed of as non - hazardous waste.
7. HANDLING AND STORAGE	
Handling : Storage :	Avoid contact with eyes, skin and clothing. Avoid breathing vapor and mist. Wash thoroughly after handling. Avoid contact with fabric or paper goods. Contact with these materials may cause rapid polymerization which can generate smoke and strong irritating vapors, and cause thermal burns. Keep in a cool, well ventilated area away from heat, sparks
	and open flame. Keep container tightly closed until ready for use.
Incompatible products :	No special restrictions on storage with other products.
8. EXPOSURE CONTROLS / PERS	ONAL PROTECTION
Engineering controls :	Use positive down - draft exhaust ventilation if general
	ventilation is insufficient to maintain vapor concentration
	below established exposure limits.
Respiratory protection :	Use NIOSH approved respirator if there is potential to exceed
